- **Other Technologies:** Git, Linux, macOS, Windows, MySQL, PostgreSQL, MongoDB

## WORK EXPERIENCE

---

**DevOps Engineer Co-op**

January 2020 - August 2020

*Indigo Agriculture*

*Boston, MA*

- Designed and implemented process for automatically tagging resources in AWS environments
- Created pipeline for granting developers elevated AWS access for on-call shifts and emergencies
- Supported developers by maintaining and troubleshooting continuous build/deployment systems
- Drafted documentation outlining design and prospective features for DevOps software products

**Board Member**

April 2019 - April 2020

*HackBeanpot*

*Boston, MA*

- Collaborated with a diverse team, created hackathon for curious students, hackers, and beginners
- Implemented new website design and updated application portal as part of technical team

**Research Assistant**

July 2019 - September 2019

*Mon(IOT)r Research Group at Northeastern University*

*Boston, MA*

- Reverse-engineered Amazon's internal Alexa API using man-in-the-middle (mitm) proxy
- Automated scraping Amazon's website for audio recordings generated by Amazon Alexa

## PROJECTS

---

**ElytraRace:**

April 2020

- Applied object-oriented design and linear algebra concepts to Minecraft mini-game created in Java
- Improved efficiency and playability through basic load-balancing and testing with hundreds of players

**CrimePot:** *Rookie of the Year Award at HackBeanpot '19*

February 2019

- Displayed Boston Police data on Google Maps interface using Flask framework to handle requests
- Highlighted potentially disadvantaged areas, visualized demand for increased public health resources

## INTERESTS

---

Baseball, IOT, hackathons, Raspberry Pi, improvisation, connecting people to technology, sandwiches
